Listing first 45
Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                              .·

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                         Score

(L Biochim. Blophys. Acta 915:210-216(1987).

(L BIOCTION: POTENT PRESYNAPTIC NEUROTOXIN POSSESSING PHOSPHOLIPASE ACTIVITY. SUBUNIT A IS LETHAL TO MICE AT 4 MG/KG (I.V.). IT IS ESSENTIAL FOR THE NEUROTOXICITY OF TEXTILOTOXIN. SUBUNIT A CESSENTIAL FOR THE NEUROTOXICITY OF TEXTILOTOXIN. SUBUNIT A POSSESSES A LOW PHOSPHOLIPASE ACTIVITY.

(C POSSESSES A LOW PHOSPHOPASE ACTIVITY.

(C -1- FUNCTION: PA2 CATALYZES THE CALCIUM-DEPENDENT HYDROLYSIS OF THE CACTIVITY PHOSPHOTIVE HOLINE + H(2)0 - 1-ACYLGLYCERYL-COMPACTURITY: PHOSPHOTIVE NOTONICAL ENTRY LINKED SUBUNITS A, B, COMPACTURITY PHOSPHOTIVE NOTONICAL SUBUNITS.

(C -1- SUBUNIT: PENTAMER OF THREE NON-COVALENTLY LINKED SUBUNITS. A, B, CAND C, AND TWO LDENTICAL COVALENTLY LINKED SUBUNITS.

(C -1- MINCELLANGUS: ALL SUBUNITS ARE NECESSARY FOR MAXIMUM LETHALITY.

(C -1- SIMILARITY: BELONGS TO THE PHOSPHOLIPASE A2 FAMILY. 9

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  FUNCTION: THIS SIGMA FACTOR IS RESPONSIBLE FOR THE EXPRESSION OF THE NITROGEN FIXATION PROTEINS (NIF OPERON), GLNA AND DCTA FOR DICARBOXYLATE TRANSPORT. THE OPEN COMPLEX (SIGMA-54 AND CORE RNA POLYMERASE) SERVED AS THE RECEPTOR FOR RECEIPT OF THE MELTING SIGNAL FROM THE REMOTELY BOUND ACTIVATOR PROTEINS NIFA, NITRC, OR DCTD FOR THE EXPRESSION OF THE REGULATED PROTEINS.

SIMILARITY: BELONGS TO THE SIGMA-54 FACTOR FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     THEN IS RELEASED

"Cloning, expression and characterization of plasma platelet-activating factor-acetylhydrolase from guinea pig.";
J. Blochem. 120:838-844(1996).
1- FUNCTION: MODULATES THE ACTION OF PLATELET-ACTIVATING FACTOR (PAF)
BY HYDROLYZING THE SN-2 ESTEN BOND TO YIELD THE BIOLOGICALLY
INACTIVE LYSO-PAF. HAS A SPECIFICITY FOR SUBSTRATES WITH A SHORT
RESIDUE AT THE THE SN-2 POSITION. IT IS INACTIVE AGAINST LONG-
                                                                                                                                                                                                                                            CARBOHYD

Natl. Acad. Sci. U.S.A. 93:4638-4643(1996).
-!- FUNCTION: MAY SERVE AS "FLIPPASE" AS WELL AS A GLUCOSYLTRANSFERASE
THAT TRANSFERS GLUCOSE TO CERAMIDE.
-!- CATALYTIC ACTIVITY: UDD-GLUCOSE + N-ACYLSPHINGOSINE =
UDP + D-GLUCOSYL-N-ACYLSPHINGOSINE.
-!- PATHWAY: FIRST GLYCOSYLATION STEP OF GLYCOSPHINGOLIPID SYNTHESIS.
-!- SUBCELLULAR LOCATION: TYPE III MEMBRANE PROTEIN. ENDOPLASMIC
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    01-NOV-1997 (Rel. 35, Created)

"Disruption of mitotic spindle orientation in a yeast dynein mutant.";

Proc. Natl. Acad. Sci. U.S.A. 90:10096-10100(1993).

-I- FUNCTION: DYNEIN HAS ATPASE ACTIVITY. CYTOPLASMIC DYNEIN ACTS AS A MOTOR FOR THE INTRACELULIAR RETROGRADE MOTILITY OF VESICLES AND ORGANIZLES ALONG MICROTUBULES. REQUIRED TO MAINTAIN UNIFORM NUCLEAR DISTRIBUTION IN HYPHAE. MAY PLAY AN IMPORTANT ROLE IN THE PROPER ORIENTATION OF THE MITOTIC SPINDLE INTO THE BUDDING DAMIGHTER OFFIT. VERSON

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed;
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Score
